Nitrocision[®] and Conco Services Announce New Agreement

IDAHO FALLS, IDAHO -- Nitrocision, LLC, the world leader in liquid nitrogen-based cutting and cleaning technology, has signed an exclusive agreement with Conco Systems' Industrial Services Division in Pittsburg, Penn. to offer its customers Nitrocision's liquid nitrogen cleaning technology. This agreement expands the range of products and services Conco offers to its customers in the industrial cleaning division.

Nitrocision's liquid nitrogen technology eliminates the secondary waste stream created by traditional cleaning systems.

"Waste water generated in the cleaning of exchangers can be very costly to manage and dispose of," said Ron Warnecke, Nitrocision's president and CEO. "By using the NitroJet system, Conco customers will realize significant savings by eliminating the secondary waste and the costs associated with managing it."

NitroJet uses liquid nitrogen under extreme pressure and temperatures to remove coatings and unwanted material. The liquid nitrogen quickly expands to nearly 700 times its original volume, removing the coating without damaging the substrate material. The liquid nitrogen technology doesn't contribute to greenhouse gases because it dissipates back into the atmosphere which is already 78 percent nitrogen.

About Nitrocision, LLC

Nitrocision developed and patented the only industrial precision cutting and cleaning technology using liquid nitrogen. The technology helps a diverse range of companies with their cleaning and cutting needs while reducing environmental impact by eliminating cross contamination and secondary waste streams. For additional information, visit www.nitrocision.com.

About Conco Services

Founded in 1923, Conco is the worldwide leader in heat exchanger cleaning services to the power generation, petrochemical and refinery industries. In addition, Conco Systems provides non-destructive testing including eddy current, RFT, IRIS and tracer gas leak detection services utilizing exclusive technology. For more information, visit www.concosystems.com.
